THE CISCO LITHIUM PROJECT

EEYOU ISTCHEE JAMES BAY QUEBEC, CANADA

TSX.V: **QTWO** | OTCQB: **QUEXF** | FSE: **458**

FORWARD-LOOKING STATEMENT

THIS PRESENTATION CONTAINS CERTAIN FORWARD-LOOKING STATEMENTS

that reflect the current views and/or expectations of Q2 Metals Corp. (the “Company” or “Q2”) with respect to its business and future events including statements regarding its exploration plans and the Company’s expectations respecting future exploration results, the markets for the minerals underlying the Company’s projects, and growth strategies. Forward-looking statements are based on the then-current expectations, beliefs, assumptions, estimates and forecasts about the business and the markets in which the Company operates. Investors are cautioned that all forward-looking statements involve risks and uncertainties, including: the inherent risks involved in the exploration and development of mineral properties, the uncertainties involved in interpreting drill results and other exploration data, the uncertainties respecting historical resource estimates, the potential for delays in exploration or development activities, the geology, grade and continuity of mineral deposits, the possibility that future exploration, development or mining results will not be consistent with the Company’s expectations, accidents, equipment breakdowns, title and permitting matters, labour disputes or other unanticipated difficulties with or interruptions in operations, fluctuating metal prices, unanticipated costs and expenses, uncertainties relating to the availability and costs of financing needed in the future and regulatory restrictions, including environmental regulatory restrictions. These risks, as well as others, including those set forth in the Company’s filings with Canadian securities regulators, could cause actual results and events to vary significantly. Accordingly, readers should not place undue reliance on forward-looking statements and information. There can be no assurance that forward-looking information, or the material factors or assumptions used to develop such forward looking information, will prove to be accurate. The Company does

not undertake any obligations to release publicly any revisions for updating any voluntary forward-looking statements, except as required by applicable securities law.

Neil McCallum, B.Sc., P.Geol, is a Qualified Person as defined by NI 43-101, and a registered permit holder with the Ordre des Géologues du Québec and member in good standing with the Professional Geoscientists of Ontario. Mr. McCallum has reviewed and approved the technical information in this presentation. Mr. McCallum is a director and the Vice President Exploration for Q2.

Mineral resources which are not mineral reserves do not have demonstrated economic viability. With respect to “indicated mineral resource” and “inferred mineral resource”, there is a great amount of uncertainty as to their existence and a great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of a “measured mineral resource”, “indicated mineral resource” or “inferred mineral resource” will ever be upgraded to a higher category.

CAUTIONARY NOTE TO US INVESTORS REGARDING RESOURCE ESTIMATES

The terms “mineral resource”, “measured mineral resource”, “indicated mineral resource”, “inferred mineral resource” used herein are Canadian mining terms used in accordance with NI 43-101 under the guidelines set out in the Canadian Institute of Mining and Metallurgy and Petroleum (the “CIM”) Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council, as may be amended from time to time. These definitions differ from the definitions in the United States Securities & Exchange Commission (“SEC”) Industry Guide 7. In the United States, a mineral reserve is defined as a part of a mineral deposit which could be economically

and legally extracted or produced at the time the mineral reserve determination is made. While the terms “mineral resource”, “measured mineral resource”, “indicated mineral resource”, and “inferred mineral resource” are recognized and required by Canadian regulations, they are not defined terms under standards in the United States and normally are not permitted to be used in reports and registration statements filed with the SEC. As such, information contained herein concerning descriptions of mineralization and resources under Canadian standards may not be comparable to similar information made public by U.S. companies in SEC filings. Accordingly, information herein containing descriptions of our mineral deposits may not be comparable to similar information made public by US companies subject to the reporting and disclosure requirements under US federal securities laws and the rules and regulations thereunder.

THIRD-PARTY INFORMATION

Where this presentation quotes any information or statistics from any external source, it should not be interpreted that the Company has adopted or endorsed such information or statistics as being accurate. Some of the information presented herein, including scientific and technical information on third-party projects, is based on or derived from statements by third parties, has not been independently verified by or on behalf of the Company and the Company makes no representation or warranty, express or implied, respecting the accuracy or completeness of such information or any other information or opinions contained herein, for any purpose whatsoever. References to third-party projects herein are for illustrative purposes only and are not necessarily indicative of the exploration potential, extent or nature of mineralization, or potential future results of the Company’s projects.

Q2 METALS

Rapidly advancing the
Cisco Lithium Project,
located in the Nemaska
traditional territory of the
Eeyou Istchee James Bay,
Quebec, Canada.

OUR TEAM

ALICIA MILNE

CEO, President & Director

Legal professional with 20+ years of experience in securities and corporate administration of public companies. Formerly the Corporate Secretary of Pretium Resources Inc.

KEITH PHILLIPS

Executive Chair

Former CEO of Piedmont Lithium and 30+ years on Wall Street leading mining investment banking teams at Merrill Lynch, J.P. Morgan, Dahlman Rose. Keith also served as Head of Canadian Investment Banking Services for Goldman Sachs.

SIMON COHN

B. Eng (Mining)

Director

Mining engineer with 20+ years of experience, Co-Founder of Mining Projects Accelerator (MPX) and a non-executive Director of MEC Mining, a global technical mining services consulting form.

NEIL McCALLUM

P. Geol

VP Exploration, Director

Geologist with 20+ years in North American mineral exploration, specializing in hard rock lithium projects, including identifying PMET Resources' feasibility-stage Shaakichiuwaanaan project.

KEVIN BOTTOMLEY

Director

Public company executive and capital markets advisor with an extensive global investor network. Kevin has raised \$200M+ over 15+ years.

LEO POWER

MBA, MOGS, ICD.D

Director

Entrepreneur focused on energy and natural resources. Leo holds an MBA, a Master of Oil and Gas Studies (MOGS) and a ICD.D. Former advisor to a Sr. Minister in Govt of Canada and to a former Premier of Newfoundland and Labrador.

JODY BELLEFLEUR

CPA, CGA

CFO

A CPA, CGA with over 25 years' experience as a corporate accountant, focusing exclusively on public companies for the last 15 years.

SIMON GAVIN

VP ESG

Businessman and entrepreneur with 20+ years in community relations and regional development. Simon maintains close relationships with First Nations and local stakeholders, advancing the ESG program.

CHRIS ACKERMAN

LLB

Corporate Development

JASON McBRIDE

IR Manager

THE

CISCO

LITHIUM PROJECT

EEYOU ISTCHEE JAMES BAY
QUEBEC, CANADA

Q2 METALS

LOCATION & KEY INFRASTRUCTURE

- Canada is a top global mining jurisdiction with a well-established and predictable permitting regime & critical minerals investment funds.
- Quebec is recognized as mining-friendly, with numerous operational mines and strong support through provincial mining investment funds.
- Quebec's *Strategy for the Development of Critical and Strategic Minerals 2025-2031* focuses on stimulating and accelerating mineral projects, modernizing port areas, road & rail corridors and improving access to energy to support mining projects.
- Cisco is located within the greater Nemaska traditional territory of the southernmost part of the Eeyou Istchee, James Bay region, an active mining and primary industry area.
- The all-season Billy Diamond Highway connects Cisco to the rail line in the town of Matagami, 150 km to the south.
- Rail at Matagami connects to international shipping from the St. Lawrence Seaway via the Bécancour port and industrial park, as well as port facilities in Saguenay.
- Bécancour is being developed as a battery hub, attracting major investments by both the Federal & Provincial governments as well as General Motors, POSCO, EcoPro and others.

PROJECT AREA & MILESTONES

The Cisco Project is comprised of 801 contiguous mineral claims over 41,253 hectares and is located along the Frotet Evans Greenstone Belt, the same greenstone belt that hosts the Sirmac and Moblan lithium deposits.

Q2 is in the process of securing permits for a new access trail from the Billy Diamond Highway directly to the deposit area, and a new camp facility.

Milestones

- 2022 & 2023: Property vendors discovered the mineralized zone (CO1) and completed a **1,287 m** drill program over **6 holes**, including:
 - CS-23-05: 5 separate intervals including **48.0 m** at **1.36% Li₂O**.
- **February 2024: Q2 acquired the Cisco Project.**
- 2024: **6,359 m** drilled across **17 holes**.
- 2025: **24,311 m** drilled across **53 holes**.
 - Exploration Target published based on first 40 holes.
- 2026: Total drilled to date: **34,123 m** across **83 holes**.
 - **Inaugural Mineral Resource Estimate** pending.

INDUSTRY LEADING INTERVALS

Mineralization starts at surface and on average continues to a depth of 400 metres and remains **open in all directions**.

- CS-24-010: widest interval of **120.3 m** at **1.72% Li₂O**
- CS-24-018: widest interval of **215.6 m** at **1.69% Li₂O**,
including **64.6 m** at **2.29% Li₂O**
- CS-24-021: widest interval of **347.1 m** at **1.35% Li₂O**
- CS-24-023: widest interval of **188.6 m** at **1.56% Li₂O**
- CS-25-027: widest interval of **179.6 m** at **1.66% Li₂O**,
and two additional intervals of **58 m** at **1.75% Li₂O**
and **91.8 m** at **1.81% Li₂O**
- CS-25-036: widest interval of **272.5 m** at **1.61% Li₂O**
- CS-25-044: widest interval of **457.4 m** at **1.65% Li₂O**
top global hard rock lithium intercept
- CS-25-065: widest interval of **179.2 m** at **1.24% Li₂O**
- CS-25-073: widest interval of **170.2 m** at **1.99% Li₂O**,
including **40.1 m** at **2.89% Li₂O**

LONG SECTION

EXPLORATION TARGET

- The Exploration Target is constrained to the main Mineralized Zone.
- Prepared by independent consultant BBA Inc. in July 2025.
- Based on **40 holes** drilled for **16,167.8 m**.
- Estimated range of lithium mineralization:

Tonnage Range (Mt)		Li ₂ O Range (%)	
Minimum	Maximum	Minimum	Maximum
215	329	1.00	1.38

- The Exploration Target does not include prospective geology and targets that the Company has identified outside of the Mineralized Zone.

The potential quantity and grade of the Company's Exploration Target are conceptual in nature. There has been insufficient exploration to estimate and define a Mineral Resource, as defined by National Instrument 43-101 Standards of Disclosure for Mineral Project ("NI 43-101"), and it is uncertain if further exploration will result in the target being delineated as a Mineral Resource.

EXPLORATION TARGET

The following images are taken from the Leapfrog [modeling video of the Exploration Target](#).

An Exploration Target is used to provide a conceptual estimate of the potential quantity and grade of a mineral deposit, based on known and additional limited geological evidence. It is an early-stage assessment that will help to guide further exploration.

It is not a mineral resource or mineral reserve and should not be treated as such.

CROSS SECTION A

CROSS SECTION B

CROSS SECTION C

METALLURGY

- Spodumene confirmed as the primary lithium-bearing mineral within all pegmatite samples (no petalite, etc.).
- Phase 1 of metallurgy test work: 3 composite samples tested using Heavy Liquid Separation (HLS) to confirm the potential suitability of a Dense Media Separation (DMS) process:
 - Composite 18: 74.1% recovery to produce a 5.69% Li₂O concentrate with low iron of 0.42% Fe₂O₃
 - Composite 21: 69.6% recovery to produce a 5.08% Li₂O concentrate with low iron of 0.55% Fe₂O₃
 - Composite 23: 71.6% recovery to produce a 5.60% Li₂O concentrate with low iron of 0.46% Fe₂O₃
- Phase 2 of metallurgy test work: currently in process, testing additional samples from across the deposit area using HLS (results pending).
- Objective is to employ a traditional lithium pegmatite flowsheet for mineral processing.

Phase I HLS Composite Summary

Drill Hole	Composite Name	Li ₂ O (%)	Fe ₂ O ₃	Spodumene (%)
CS24-018	Comp 18	1.53	0.37	17.3
CS24-021	Comp 21	1.53	0.39	18.6
CS24-023	Comp 23	1.68	0.42	19.2

Phase I HLS Test Results Summary

Drill Hole	Composite Name	Cut Point SG	Recovery (%)	Li ₂ O (%)
CS24-018	Comp 18	1.53	0.37	17.3
CS24-021	Comp 21	1.53	0.39	18.6
CS24-023	Comp 23	1.68	0.42	19.2

COMMUNITY ENGAGEMENT

- Q2 is prioritizing the establishment and strengthening of relationships with the community based on transparency, information sharing, with consistent and constructive open dialogue.
- Engagement and communication with local stakeholders including the Cree Nation Government, the Cree Nations of Nemaska and Waswanipi, the local Tallyman, the Town of Matagami and the Eeyou Istchee James Bay Regional Government.
- Cisco is 230 km from the Community of the Nemaska Cree Nation.
- Cisco is on Category 3 lands within the traditional territory of the Cree Nation, on the N20 trapline.
- The Mineralized Zone at Cisco is 6 km from the highway and not accessible by public roads.

FOUNDATIONS IN PLACE

- Early engagement with communities and ongoing dialogue with the Cree Nations and the Tallyman.
- Partnerships with Cree-owned and regional businesses operating in Eeyou Istchee James Bay to ensure economic activity generated by the Cisco Project contributes directly to local and regional economies.
- Community engagement supporting benefit events and local initiatives.
- Formal ESG framework in place with service providers.
- Integration of ESG, Health and Safety into all operations.
- ECOLOGO certification in process, which provides credible, third-party verification to a globally recognized and trusted ecolabelling program, validating responsible business practices.

KEPA TRANSPORT

**AIR
CREEBEC**

UPCOMING CATALYSTS

- Inaugural inferred Mineral Resource Estimate
- Rolling assays from 4 drill rigs currently operating at Cisco
- Advanced metallurgical testing
- Commencement of Preliminary Economic Assessment work
- Commencement of baseline studies
- Permitting access road and camp
- Initial Preliminary Economic Assessment

WHY Q2 METALS

TIER ONE ASSET / ACCELERATED TIMELINE

- Inaugural inferred Mineral Resource Estimate pending.
- Initial Preliminary Economic Assessment targeted for Q4 2026.
- Ongoing permitting & baseline environmental studies.

TOP JURISDICTION

- The *Quebec Strategy for the Development of Critical and Strategic Minerals 2025-2031* has a stated goal of making the province a hub for the exploration, production, processing and recycling of critical and strategic minerals.

INFRASTRUCTURE ADVANTAGE

- The Cisco Project is 150 km north of the rail line in Matagami via the all-season Billy Diamond Highway.

PROVEN LEADERSHIP

- Team has delivered exceptional value to date, further strengthening of the board & management planned for 2026.

COMMUNITY & FIRST NATIONS ENGAGEMENT

- Engagement with the Cree Nation, local land users & communities; partnerships with Cree-owned and regional businesses; ECOLOGO certification underway.

POISED FOR GROWTH

- Strong balance sheet, near-term catalysts, blue sky, strengthening lithium market.
